

DENON - AML-ART at GYRE GALLERY, OMOTESANDO

DENON Brand experience + Cultural positioning

Denon sponsorship with the "One With Nature" December 1 – Jan 8 Art Exhibition to be held at GYRE Gallery, Omotesando

- The partnership begins with a genuine integration of Denon's audio technology into the artistic journey itself — from Spring through Summer and Fall, as Alejandro paints live across iconic American and Japanese landscapes. Denon equipment travels with the artist into the field, capturing the soundscapes of each location: wind across desert rock, ocean surge, the silence of high altitude. These become the sonic foundation of the exhibition.
- Documentary films and still images will be produced showing Denon's role in the creative process — not as backdrop, but as instrument. Cutdowns will be used across GYRE Gallery, AML-Art, and Denon Japan's in-store and social media channels, positioning Denon as the brand that understood that great art demands great sound.
- In the gallery itself, the actual field equipment used by the artist may be displayed — worn, paint-spattered, and authentic. Denon's presence is not polished advertising but lived experience, which speaks directly to the values of the GYRE audience.
- The exhibition will allow visitors to experience the full Hi-Res Audio soundscapes from each landscape — a listening space within a gallery, where the journey continues through sound alone.

GYRE Gallery draws thousands of visitors over the December holiday period from its surrounding retailers and restaurants. For Denon Japan — a brand born in Tokyo — this is a homecoming, and a rare opportunity to lead the cultural conversation at one of Omotesando's most respected addresses.
